

## Bar Graphs - I

1. Jackie surveyed a few people outside a cinema theatre. The bar graphs show the results of her survey. Use the graph to solve the following problems.

- Which type of movies do most people prefer?
- Which type of movies was chosen by the fewest people?
- How many people chose action movies?
- How many more people chose Sci-Fi movies over comedy movies?
- How many people were surveyed?

**Solution:**

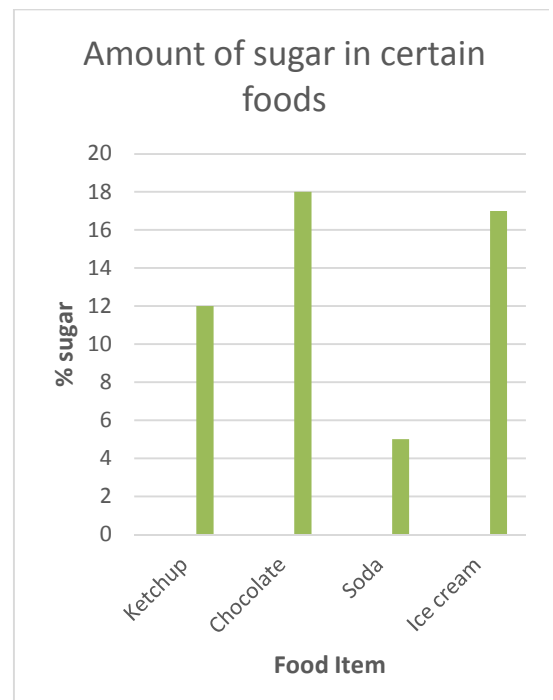

- 
- 
- 

**Solution:**

- 
- 

2. Cory collected the data about the content of sugar in various kinds of food items. The bar graphs show the data. Use the graph to solve the following problems.

- Which food item has most sugar content?
- Which food item has least sugar content?
- What is the percentage of other items except sugar in soda?
- Arrange the food items in increasing order of sugar content.
- What is the difference between the % of sugar content in Chocolate and Ketchup?

**Solution:**

- |    |    |
|----|----|
| a. | d. |
| b. | e. |
| c. |    |
